

# Welcome to Burbank Dental Lab

Est. 1979 | Burbank, CA

## About Burbank Dental Lab

Founded in 1979, Burbank Dental Laboratory is a family-owned, full-service digital lab with a legacy of excellence and innovation. Under the leadership of Tony and Andrew Sedler, Burbank evolved into a technology-driven partner for clinicians nationwide, offering advanced restorative solutions—from esthetic all-ceramics and implants to photogrammetry scanning and digital workflows.

Recognized as one of the Top 5 Dental Labs in the U.S., Burbank is FDA and ISO certified, and a trusted federal contractor for the VA, Defense Health Agency, and more. With in-house milling of titanium and chrome components and a commitment to education and CE programs, Burbank delivers precision, consistency, and outstanding results.

*“For more than 20 years, Burbank Dental has provided outstanding quality and service. Their team is always approachable, knowledgeable, and supportive. I highly recommend them as a trusted full-service lab partner.”*

– Dr. Patric Cohen

# The Denbright Scanner Program

**One Platform. One Seamless Digital Workflow.**

Bring the future of dentistry into your practice, with **no upfront capital investment**. Denbright Dental Labs partnered with Align Technology to deliver the industry-leading iTero Lumina™ scanner, powering both restorative and Invisalign workflows.

## Why Practices Choose Denbright

### No Upfront Capital Investment

Receive an iTero scanner by committing to only \$3,000/month in **NEW** lab volume

### All-in-One Digital Workflow

Submit restorative and Invisalign cases seamlessly

### Full Support

Installation, training, and ongoing lab support included

### Flexible & Scalable

Send cases to one or all 7 Denbright labs

## Why Go Digital?

- Faster, more efficient workflows
- Improved case acceptance
- Better patient experience
- Scalable practice growth

## Simple Onboarding

- In-office installation
- Virtual training
- Dedicated support teams
- CE & ongoing education

*The iTero scanner has transformed my practice beyond impressions, it's reinvented the exam process. With the Align Oral Health Suite, I can clearly show patients their gum health, alignment, and bite, share instant reports, and even simulate outcomes, driving earlier diagnosis, better understanding, and higher case acceptance."*

*- Dr. Steven Glassman*

## This isn't just a scanner.

It's the connection point between two of the most trusted names in dentistry - Denbright and Align. By participating in the program, your practice gains digital access to Denbright's platform of **7 established, top-tier dental laboratories.**

## How it works

The iTero Lumina™ scanner is powered by **iTero Multi-Direct Capture™ (MDC) technology**, designed to quickly<sup>3</sup> and accurately<sup>1</sup> capture more data<sup>4</sup>.

**3x larger field of view<sup>4</sup>** and maximum capture distance of 25mm, designed to **scan 2x faster<sup>3</sup>** and simplify the capture of challenging areas for dentures, palates, edentulous spaces, and other complex cases.

Visualize your cases with **photorealistic 3D models<sup>5</sup>**, **HD intraoral camera** and **iTero™ NIRI images** (Near Infra-Red Imaging) to aid in multi-modality assessments and efficient treatment planning.

## Key benefits

### Superior clinical accuracy<sup>1</sup> for high confidence in your results

- Achieve predictable and repeatable first-time restoration fit<sup>2</sup> from a single unit crown to removable prosthetics, thanks to superior full-jaw accuracy compared to competitors<sup>1</sup>.

### Outstanding simplicity for highly efficient workflows

- Experience remarkable efficiency by capturing single unit crowns to full arch preparations in a single pass.

### One device for endless possibilities

- Leverage versatility with photorealistic 3D models, HD intraoral camera, and iTero NIRI images that aid in interproximal caries detection – all in one device – to minimize chair time and optimize workflows and footprint.

### Elevated patient experience for exceptional care

- Offer a quick and comfortable experience<sup>6</sup> for your patients.
- Increase patient engagement and understanding with patient-centric views of their oral health condition.

➤ **See what the iTero Lumina™ scanner can do for your practice.**  
Contact your Align representative or visit [itero.com](https://www.itero.com) for more information.

1. Based on bench testing conducted using ADA/ANSI 132 standard Model simulating "long distance accuracy (full jaw measurement)" in July 2024. Method: Comparative test to evaluate full arch accuracy (global accuracy), repeatability and reproducibility of intraoral scanners as described in ADA standard 132 [2015]; Sample definition: 3 operators performed 30 repetitive scans with each tested scanner; Sample size: n=90 (3x30) scans for each scanner tested; Tested scanners: iTero Lumina; Trios 5; CS3800; Medit i700; Allied Star; Results: The accuracy of iTero Lumina is significantly higher than that of all 4 competitors; with a reduction of total error ranging from 0.11% to 0.46%. Accuracy was defined as the accumulated average error + STD of all measurements specified in the standard. Data on file at Align Technology, as of August 26, 2024. 2. Based on bench testing conducted in June 2024 according to ADA/ANSI 132 standard requirements for long distance full jaw accuracy (average error =0.03% - 0.24% < 0.25%), crown accuracy (average error =0% - 0.9% < 1%) and inlay accuracy specimens (average error =0% - 0.4% < 1%). Data on file at Align Technology, as of August 26, 2024. 3. Compared to the iTero Element™ 5D imaging system with tolerance AVE=±0.1 operating at a working distance from 0-20 mm. Data on file at Align Technology, as of November 15, 2023. 4. The iTero Lumina intraoral scanner offers 3x larger field of view designed for more surface area capture enabling faster scanning.\*Compared to the field of view of the iTero Element 5D imaging system, when the iTero Lumina™ intraoral scanner's scanning distance is 12 mm. Data on file at Align Technology, as of November 15, 2023. 5. Based on clinical data collected in January 2024 of n=15 subjects who participated in a clinical study with iTero Lumina intraoral scanner. Data reviewed by Invisalign trained practitioners (Orthodontists and GPs) in conjunction with Align clinical team. Data on File at Align Technology, as of January 31, 2024. Can not be used to imply that intraoral photographs may not be needed for practice patient records. 6. Compared to iTero Element 5D imaging system wand. Data on file at Align Technology, as of November 15, 2023.

## Scanner Program Terms and Conditions

*This offer is valid for new or additional business sent to Denbright Dental Labs.*

**Parties Involved:** Between Denbright Dental Laboratories) and the dental practice (Practice).

**Purpose:** Provides the Practice with an iTero intraoral scanner (Scanner) to support digital restorative workflows connected to Denbright's lab network.

**Effective Date:** Starts when signed by both the Practice's authorized signatory and Denbright's representative.

**Additional Revenue Definition:** Revenue from restorative cases that exceeds the Practice's pre-agreement average monthly revenue from Denbright labs (based on the trailing 12 months).

### 1. Purpose

The agreement covers the use of the provided Scanner for restorative work through Denbright's affiliated labs.

### 2. Denbright Lab Platform

- Practice gets digital access to Denbright's network of labs: Frontier Dental Laboratory, Burbank Dental Lab, D&S Dental Laboratory, NuArt Dental Inc., Friendship Dental Laboratories, Jason J. Kim Dental Lab Aesthetics, Absolute Dental Services.
- Labs handle all types of restorative cases, from single-unit crowns to full-arch rehabilitations.

### 3. Scanner Selection & Monthly Revenue Requirement

- Practice must generate a minimum additional revenue of \$3,000 USD per month per scanner (for Lumina Pro - Cart or Mobile model).
- \$599 onetime setup fee for new customers, per scanner
- Revenue is based on restorative cases submitted to Denbright's labs, using standard fee schedules.
- Calculated monthly on the 1st of the following month; total from all cases per office.

- Practice must keep their account current.
- If minimum not met for two consecutive months, Denbright can terminate immediately and require scanner return.

### 4. Agreement & Termination

- Not a financial lease.
- Either party can terminate with 30 days' written notice.
- Upon termination, Practice must ship the scanner (in good working condition) at their expense within 7 business days.
- Provide shipping tracking and office info to [info@denbright.com](mailto:info@denbright.com).

### 5. Ownership & Use

- Scanner remains Denbright's property.
- Practice cannot sell, lease, relocate, or transfer it.
- Use only for patient care and lab submissions, following manufacturer instructions and laws/regulations.

### 6. Support & Training

- Includes software licensing, installation, onboarding, and team training.
- Denbright (with Align Technologies) provides ongoing technical support, virtual/in-office training.
- Additional Continuing Education available on a time-and-materials basis at Practice's request.

### 7. Set Up Fee and Early Exit Fee

- Practice agrees to pay Denbright a one-time setup fee of \$599 USD per Scanner ("Setup Fee") upon execution of this Agreement and prior to delivery of the Scanner. Practice agrees to pay Denbright a one-time early exit fee of \$999 USD per Scanner ("Exit Fee") if the practice exits the program for any reason within the first calendar year of contract start.

## Scanner Program FAQs

**How long does it take for a customer to receive a scanner once they are approved by Denbright?**

Usually delivery, install and training can be scheduled immediately when application and agreements are signed. The scanner can typically be delivered in 1 -2 weeks.

**We have one practice that wants a scanner but there are 3 doctors in the practice, each with their own account. Will they each have to commit to the monthly revenue requirement?**

No. The monthly revenue requirement is based on the organization. We do require all accounts to be in the same physical location. Your goal can be achieved through traditional or digital impressions.

**Do we need to send all our cases to one lab?**

No, you have access to all 7 Denbright Dental Labs.

**When does the monthly commitment start?**

Commitment starts the day both parties have signed the contract. Send impressions or scans from any scanner.

**Do I have to pay to ship the scanner back?**

Yes, it is the office's responsibility to handle and pay for shipping if exiting the program. Please keep the original box. One can be provided for a fee. Denbright will provide guidance and shipping details.

**What are the lab prices?**

We do not price match, and each lab has its own fee schedule. The lab's fees are set for 2026.

**Do Invisalign cases count towards the commitment?**

No, only cases sent to Denbright labs count towards the commitment.

**Can I still send analog cases?**

We encourage you to reach 75% digital submissions in 3 months as a goal. Analog impressions count towards the commitment, but typically, cases have higher prices and turnaround times.

**I'm already doing digital dentistry, do I need iTero training?**

Training is key to receiving the best restorations from the lab, even if you are experienced with legacy iTero units or other scanners.

**Is there a path to owning the scanner?**

No, our program is built to have Denbright take on all the risk and capital expenditure.

## POLICIES

### SHIPPING POLICIES:

Burbank Dental Lab provides a complimentary pickup service in Los Angeles County.

For all other cases shipping is charged on first round-trip invoice at \$13.95; each additional round-trip shipping is invoiced at \$27.90. Please call for rates when shipping from Hawaii, Alaska, or international locations.

### TERMS & POLICIES:

All accounts are payable within 30 days of statement date. The statement date is the last working day of each month. Accounts not paid within stated terms will be subject to Cash-On-Delivery status and a late charge of 2% of the unpaid balance. All fees and schedules are subject to change without notice.

### WARRANTY STATEMENT:

**Veneers:** 1-year conditional warranty. If fractures occur during the cementation application, Burbank Dental Lab will remake the restoration at 50% of the original service fee, plus shipping and any other incidentals, such as soft-tissue models, etc.

**Lava, PFM's, IPS e.max, ZIRMAX.L:** 5-year conditional warranty.

**ZIRMAX M:** 10-year conditional warranty.

**Smart Composite Hybrid:** 3 years on Composite conditional warranty.

**Smart Zirconia Hybrid:** 5-year conditional warranty.

**Smart Acrylic Hybrid:** 3-year conditional warranty.

**Dentures and Metal Base Partials:** 1-year conditional warranty.

**Acrylic Partials and Valplast:** 6-month conditional warranty.

**Retainers:** 3-month conditional warranty.

**Night Guards:** 6-month conditional warranty.

**Sleep Apnea Devices:** 6-month conditional warranty.

**Implant Restorations:** SMART 1 dental abutments are backed by a comprehensive dental abutment warranty - lifetime for titanium abutments, and 5 years for zirconia abutments, and titanium bars.

In addition, if an implant supplier does not honor their warranty, due to the use of a SMART 1 abutment, Burbank Dental Lab will replace both the abutment and the implant component. (Surgery Excluded)

### CONDITIONAL WARRANTY DETAILS:

All warranties are conditional. Patient must receive regular dental recall checkups from the original practicing dentist that seated restorations, as well as meet all post-care recommendations prescribed, including but not limited to, mandatory night guard compliance.

Any damage due to trauma is excluded from warranty. Additional restorative procedures, including but not limited to endodontic or orthodontic treatment, addition of a partial denture, loss of or failure of teeth, may void warranty. Burbank Dental Lab is not responsible for changes regarding teeth that receive restorations, including but not limited to, cases of loss and/or fracturing of abutment teeth prior to, during, or after cementation.

This warranty does not apply to any cases and/or restorations that have been recognized as having contra indications by Burbank Dental Lab. All warranties will be remedied by remake of original class of restorations at no charge. Refunds or credits on accounts are not included in this warranty.

All delays in requested or necessary communications between lab and clinician will result in the case being put on hold. Cases on hold may require the delivery date to be adjusted.

All implant turn-around times are upon the previous step having been completed with NO alterations in set-up or platform choices, i.e., additional multi-abutments.
