

Mastering Restorative Workflows with the iTero Lumina[™] Scanner

The following complimentary webinars, led by our iTero[™] certified clinical trainers at Align Technology, are designed to provide dental professionals with a comprehensive understanding of the iTero Lumina[™] scanner and its advanced capabilities in restorative procedures. Participants will explore the key features and technological advancements of the system, learning how these innovations enhance accuracy and efficiency in restorative workflows. The sessions will also focus on practical application, guiding attendees through the essential scanning techniques needed to optimize results.

At the end of the course, participants will be able to:

- Explain the key features and technological advancements of the iTero Lumina[™] scanner for restorative procedures
- Apply key principles and techniques when scanning with the iTero Lumina[™] for restorative procedures
- Maximize the iTero Lumina[™] imaging system through use of key applications and new advanced features
- Schedule a personalized remote coaching session with an iTero[™] Certified Clinical Trainer

About the trainers:

Holly Fereday

Holly Fereday started her journey in the dental field as a registered dental assistant. In 2018, she became a certified clinical trainer at

Align Technology, where she has been instrumental in helping practices across the nation integrate digital workflows using the iTero system.

Rachel Fazio

Rachel Fazio began her career in dentistry in 2003 as a certified dental assistant. Throughout her career, Rachel has held

many roles within the dental field. Prior to coming to Align, she successfully managed the daily operations of a large, multi-specialty practice.
